Installation guidance

Limitations of use

This product should not be finishing by skimming.

Cutting

Cut to length with snips or scissors, allowing for some thermal movement, e.g. a piece for a 2.4m floor to ceiling joint should be cut with 3mm clearance in length.

Fixing

Check boarding for secure fixing and damage and correct if necessary.

Cut to length, mitring corners around window openings etc.

Apply a coat of Gyproc Joint Filler or Gyproc EasiFill to both sides of the joint.

Pre-fold the Gyproc LevelLine to the correct angle and carefully press into the jointing compound, ensuring there is no trapped air and that the alignment is correct. Remove excess joint compound and allow to set.

Finish the joint by applying further coat(s) as required, feathered out onto the face of the boards, using any suitable Gyproc joint compound (not Gyproc Joint Filler for the final coat).

When fully dry, sand to a final finish taking care not to damage the paper, and decorate. This product should not be finished by skimming.
