

REACH NEW HEIGHTS

Pioneering ceiling systems that set new heights in design

We care about building better for people and the planet.

Gyptone Quattro 41 on GypCeiling MF system

A higher standard of ceilings

We use our pioneering plastering and drylining products to create better built environments for people to work, rest and play in.

We're on a mission to take ceilings to new heights, so they can be real room enhancers, not an afterthought.

Our range of ceiling products is designed to offer the strongest performance. From better acoustic absorption and noise control to improved speech intelligibility, our ceilings allow you to create beautiful spaces that work hard.

Gyptone Quattro 41 on GypCeiling MF system

Every system, every product

In this brochure, you'll find our full range of drylining systems and products that can be used to create breathtaking ceilings that look better, work harder and make spaces healthier, and improve acoustic performance for greater speech clarity and better concentration.

From GypCeiling Concealed to Rigitone acoustic boards, everything you need to build better ceilings can be found right here.

Plus, when you use the full system, including CasoLine Quick-Lock Grid components, you'll receive a **SpecSure®** lifetime warranty.*

*Please see page 40 for more information on the **SpecSure®** warranty.

Quattro 42 board (painted grey)
on GypCeiling MF system

GypCeiling MF system

Stare at these ceilings

GypCeiling® MF creates ceilings that have to be seen to be believed. It works harmoniously with Gyproc® plasterboards and Gyptone® and Rigitone® ceiling boards to create stunning seamless ceilings that deliver fire resistance and effective sound absorption.

Whether you've envisioned a flat or curved ceiling, GypCeiling MF is exactly what you need to bring it to life.

GypCeiling MF system

Seamless ceilings for lofty ambitions

We're making it easier than ever to create ceilings that look better and work harder, and GypCeiling MF is the perfect example. It's a suspended ceiling system that looks magnificent as part of a flat or curved installation, creating a focal point that gets people looking and talking.

Suitable for most internal drylining applications, we're here to support you with even the most complex installations. It works perfectly with Gyproc plasterboard and ceiling boards from our Gyptone and Rigitone ranges, and you can take your pick from our wide range of perforation patterns to achieve the exact look you want.

This seamless, monolithic ceiling system provides high performance in abundance. By selecting the right performance specification and product mix, you can achieve up to 120 minutes of fire resistance - ideal for busy environments like schools and commercial buildings. What's more, Class B sound absorption can be achieved with Rigitone boards, creating better acoustic environments, improving speech clarity and aiding concentration.

For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

* Please see page 40 for more information on the **SpecSure** warranty.

GypCeiling Grid system

The pinnacle of ceiling design

Build ceilings that make spaces look and sound better with GypCeiling® Grid, a lightweight demountable grid system that's compatible with Gyptone® and Gyprex® ceiling tiles.

It's designed to make installation simple, and with up to Class B acoustic performance, it absorbs noise with ease.

GypCeiling Grid system

The reason to look up

Ceilings can do so much more than just make a room look better. With the acoustic performance of GypCeiling Grid, you can enjoy a more comfortable atmosphere, better sounding spaces and clearer conversations under a striking ceiling.

This demountable grid system is designed for ease of installation and easy ceiling access. It's compatible with all of our square-edge and tegular lay-in Gyptone and Gyprex tiles, and the simple hook-on connections mean the grid is stabilised as soon as one cross tee is in place. Should you need to access the ceiling cavity further down the line, you can simply remove the tiles by hand.

For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

*Please see page 40 for more information on the **SpecSure** warranty.

Gyptone Sixto 60

GypCeiling Concealed system

Set your sights on greater heights

GypCeiling® Concealed is an easy to install demountable ceiling grid system, which hides the ceiling grid for a smooth, breathtaking appearance and up to Class C acoustic absorption.

GypCeiling Concealed system

A higher standard for working and living

There's more to a beautiful space than four walls and a floor. With GypCeiling Concealed, your ceiling can be the focal point of a room, creating spaces that are better to look at and better to be in. It's easy to install, and when it's combined with our Gyptone tiles it creates stunning ceiling designs. Our GypCeiling Concealed system incorporate a D2 edge providing a fresh look and sleek finish.

Not only can GypCeiling Concealed make a space look and sound better, it also pairs with Gyptone tiles to make use of our ACTIVair® technology. ACTIVair® makes indoor air healthier by eliminating up to 70% of formaldehyde present in indoor air.

There's no need to worry about complex installations - with simple connections and specially designed tile edges, plus our support guides, the ceiling can be fitted with ease.

For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

D2

GypCeiling Lining system

Higher levels for lining

The perfect example of simple versatility, GypCeiling® Lining can be used across a wide range of projects, from residential properties to large commercial environments.

It's designed to work with our full range of Gyptone, Rigitone and Gyproc boards, and with just a 25mm ceiling cavity required, it's ideal for making the most of limited space, or spaces where the existing ceiling needs to stay.

Gyptone Quattro 41

GypCeiling Lining system

Level up any space

With GypCeiling Lining, you can ensure any space is fitted with the perfect simple ceiling. Easy to install and as versatile as they come, it's ideal for refurbishments, new build properties and commercial spaces alike. With our full range of Gyptone and Rigitone acoustic boards and Gyproc® plasterboards, you can expect much-improved performance as well as the perfect finish.

When used in conjunction with Gyproc FireLine, GypCeiling Lining can offer up to 60 minutes of fire resistance for increased escape times in emergency situations. Up to Class B acoustic performance can be achieved with Rigitone acoustic boards, which means speech will be more intelligible and conversations will be clearer. It's a ceiling system that improves so much more than the appearance of a space.

Want to preserve your existing ceiling height? No problem - with GypCeiling Lining, you only need 25mm of ceiling cavity, so you can maximise the space available to you and preserve the room's height with minimal fuss.

For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

Gyptone tiles and boards

Always raising the level

With an extensive range of patterns and sizes, and unmatched design quality, Gyptone® tiles and boards combine unique aesthetics with tried and tested acoustic performance and a high fire rating.

Easy to maintain, clean and repaint, you can use Gyptone products to create stunning ceilings, including using the boards to create curves. ACTIVair® makes indoor air healthier by eliminating up to 70% of formaldehyde present in indoor air.

Selection of tile products

Selection of board products

For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

Rigitone® boards

Rigitone boards

Coming in loud and clear

Create seamless ceilings with tried and tested acoustic performance with Rigitone® acoustic boards. Acoustic tissue is fitted on the reverse, which improves sound absorption in offices, schools, lecture halls and anywhere that people need to be heard.

You can integrate lighting, ventilation systems and speakers with ease, and repaint the surface with no impact on its performance. ACTIVair® makes indoor air healthier by eliminating up to 70% of formaldehyde present in indoor air.*

Selection of Rigitone boards

There are eight perforation patterns available for Rigitone boards. For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

*Formaldehyde reduction is based on experimental data following ISO16000-23 standards from 0.4m³ to 1.4m³ installed/m³ room. Lifetime has been confirmed experimentally and analytically on a commercial board sample in the frame of a collaborative work with independent certified body ULE and Pr J.Zhang, University of Syracuse, expert in Environmental Chemistry and Engineering, Mechanical ventilation and indoor air quality.

Gyprex® Satinspar

Gyprex tiles

Gyprex tiles for brighter, better rooms

Gyprex® Satinspar

A vinyl-faced gypsum tile with a smooth finish, Gyprex® Satinspar is incredibly easy to clean as well as being easy on the eye. Used in conjunction with GypCeiling® Grid, Gyprex Satinspar is ideal for forming demountable suspended ceilings, particularly in environments where ease of cleaning is a key consideration. The smooth, satin finish helps to create light, bright and airy spaces, and it's also available in black for a sleek and sophisticated look. What's more, with the tiles' simple cleaning needs, those spaces will stay looking their best. Gyprex Satinspar is available with tile edge A in a range of sizes.

Gyprex® Bio

Gyprex® Bio actively makes spaces healthier by stopping common types of fungi and bacteria from growing, including Salmonella, MRSA and e.Coli, thanks to the biocide contained within the ceiling tiles. The white vinyl face of the tile helps to spread light around the room, making any space look better, feel better and genuinely be better to be in. It's perfect for healthcare environments and any buildings where hygiene is a key concern, and it's stain-resistant too, so it's easy to clean and maintain the bright and airy feeling.

Selection of Gyprex tiles

Gyprex Satinspar and Gyprex Bio are available with tile edge A in a range of sizes. For more information see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

CasoLine Quick-Lock Grid

Easy installation, easy on the eye

CasoLine Quick-Lock Grid makes demountable ceiling grids simple. It's centred around stability; the innovative design means that once you've fitted one cross tee in place, the whole structure is stabilised, so you can continue the installation without a hitch. Once you've installed it, it's easy to level the ceiling, thanks to the adjustable metal hangers.

For available patterns, designs and edge details, see pages 38-39 of this brochure. Please refer to the White Book online for features and benefits of this product.

*Please see page 40 for more information on the **SpecSure®** warranty.

Appendix

British Gypsum ceiling tiles and boards come in a range of different sizes and patterns. Gyptone comes in five patterns: Quattro (squares), Line (rectangles), Point (circles), Sixto (hexagons) and Base (plain). Below is a design selector for the different patterns available. Rigitone comes in either regular or random patterns and has eight different aesthetic finishes.

Here to help

Technical expertise

As well as making ceiling systems and products, we're dedicated to ensuring you have everything you need to build better spaces. From installation guides and training courses to our unrivalled **SpecSure®** lifetime warranty,* you're in the safest of hands when you use our products.

***SpecSure® warranty**

The **SpecSure®** warranty protects your systems, products and your work, giving you peace of mind before, during and long after your project. The pioneering warranty guarantees that our drylining systems will perform as specified for the lifetime of the building, and that you'll have access to the UK's largest technical support team through every stage of your project, both on and off-site.

See **british-gypsum.com** for more information.

Installation Guidance

Our systems are designed to make installing our products as simple as possible. You can access installation guides and support via Technical Support on **british-gypsum.com**

Build Better Academy

With a huge range of industry-leading training courses, we have upskilling opportunities for everyone. Courses can be booked through our site, so you can get started in just a few clicks.

The White Book Specification Selector

The online White Book Specification selector lets you select your building element and filter and choose your specifications. Plus, you can download all documentation, including BIM and .dwg CAD files and create a personalised project pack with ease, all on our website.

Please refer to **british-gypsum.com** for full details.
