

Product Data Sheet

Gyptone Quattro 41 Access Hatch

The Gyptone Quattro 41 Access Hatch creates virtually invisible access to services, seamlessly blending in with surrounding tiles. It maintains the ceiling's acoustic performance with an acoustic backing and 12mm square perforations that absorb noise.

All Gyptone products contain ACTIVair® which makes indoor air healthier by eliminating up to 70% of formaldehyde present in indoor air.

The access hatch comes in a two-part system that's simple to install, including a 600mm frame and a 510mm tile.

Where to use

Use it with the GypCeiling MF suspended ceiling system for quick and easy access to ceiling void services without compromising on aesthetics.

Product information

Composition

Gypsum core with sound absorbent tissue bonded to the rear and an unpainted face.

Backing tissue colour

Light grey.

DIMENSIONS AND WEIGHTS

Lengths available (mm)	600
Width (mm)	600
Nominal thickness (mm)	12.5
Hatch opening length (mm)	510
Hatch opening width (mm)	510
Perforation shape	Square
Perforation width (mm)	12
Perforation length (mm)	12
Perforation spacing (mm)	25
Edge type availability	B
Weight per carton (kg)	4.4

Product Data Sheet

Gyptone Quattro 41 Access Hatch

Performance

Here we only provide performance information related to the product. Please see the White Book online for system-dependent performance.

Standards

EN 14190:2014.

Declarations of Performance (DoP) available [Click here](#).

Reaction to fire	A2-s1, d0
Specialist performance	Contains ACTIVair® technology
Moisture resistance (maximum % RH)	70
Maximum continuous temperature (°C)	45

Limitations of use

Gyptone products should be used in areas with a relative humidity that does not constantly exceed 70% or temperature of 45°C.

Fixtures

Don't use Gyptone Hatch products to support fixtures.

Installation guidance

Please see our White Book online for more information about installing and handling British Gypsum systems.

Painting

The Gyptone access hatch has an untreated surface. It should be primed using Gyproc Drywall Primer before coating with matt emulsion paint using a short-haired roller. Don't spray paint as this affects the ability to absorb sound.
