<tr>
<td><strong>Product description</strong></td>
<td>For smooth or low suction backgrounds and surfaces treated with Thistle Bond-it</td>
<td>High impact resistance for most masonry backgrounds. Can be spray applied</td>
<td>Cement-based renovation product for re-plastering after a damp-proof course</td>
<td>Suitable for many backgrounds. Can be applied by hand or mechanical plastering machine</td>
<td>Versatile skim plaster for finishing most plaster and plasterboard backgrounds</td>
<td>Designed for low to medium suction backgrounds, especially plasterboards</td>
<td>Designed to work with worm pump spray machines or can also be hand applied. Ideal for low to medium suction backgrounds.</td>
</tr>
<tr>
<td><strong>Benefits of product</strong></td>
<td>Ideal for repairs on multiple surfaces</td>
<td>Good coverage for large areas in renovations or traditional two-coat plastering</td>
<td>Takes the guesswork out for cement renovation plastering through consistent, reliable performance</td>
<td>Levels backgrounds like an undercoat, smooths to a quality finish</td>
<td>Provides a smooth, inert, high quality surface to internal walls and ceilings, and a durable base for the application of decorative finishes</td>
<td>Provides a smooth, inert, high quality surface to internal plasterboard walls and ceilings, and a durable base for the application of decorative finishes</td>
<td>Sprayed in a cross-hatching technique and flattened after 5 - 10 minutes. Trowel finished exactly as other Thistle skim. Once dry, the surface is ready for decorating with no need for any sanding or additional treatment.</td>
