Health & Safety

5. Fire fighting measures

5.1 Extinguishing media:
Suitable extinguishing media - water, foam, carbon dioxide or dry powder.

5.2 Special hazards arising from the substance or mixture:
The product does not pose a fire hazard. However, some packaging materials may burn.

6. Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures:
Do not allow to enter drains, water courses or the soil.

7. Handling and storage

7.1 Precautions for safe handling:
Use – Minimise dust generation when sawing or sanding in poorly ventilated places. Avoid eye contact - see Section 8 for recommended personal protective equipment, and Section 2 for hazards identification.
Plasterboards will not support body weight in between rafters, joints or frame members.

Manual handling – Sheets of Glasroc X can be unwieldy, use an appropriate lifting technique.

For manual handling purposes assume the board weight is 34kg

Mechanical handling – The dimensions of the pallet vary depending on the product size. To avoid potentially overloading a lift truck, it is important that any effect on load centres is considered.

7.2 Conditions for safe storage, including any incompatibilities:
Storage – Store on pallets supplied in dry conditions. To maintain stability, place pallets on firm level ground, and ensure that stacks are both level and vertical.

NB - When working with individual boards, only work from a single pallet, not a stack.

Pallet stacking heights – The maximum stack heights on level concrete floors and vertical stacks are as follows:

<table>
<thead>
<tr>
<th>Board width (mm)</th>
<th>Board length (mm)</th>
<th>Pallet stack height (packs)</th>
</tr>
</thead>
<tbody>
<tr>
<td>1200</td>
<td>2400</td>
